

## **CORAL SEA HEALTH AND SAFETY PROCEDURE**

Coral Sea Hotels, Resorts, and Nile Cruises are committed to provide all possible safety information to our guests, staff, visitors and stockholders. We believe that their safety is our first priority and represents a substantial part of our daily activities aiming to provide all involved with safe environment

Coral Sea Hotels, Resorts, and Nile Cruises are also committed to providing a healthy, hazard free environment for all our guests, employees, subcontractors, and visitors. Therefore, safety instructions are clearly displayed to our guests and emergency plan is regularly communicated, trained and followed by all team members who are highly trained for fire evacuation, fire drill, and any other sudden hazardous situation.

All our guest rooms are provided with emergency exit plans at the back of each room door. Assembly points are clearly indicated to be easily reached by guests and team members in case of emergencies. Additionally, in hotels where there are elevators, safety instruction signs are available at entrance of each elevator.

Moreover, all areas where chemicals or any other hazard substances are handled are provided with instructional materials, personal protective equipment as well as first aid box. In the unlikely event of an accident, the hotel immediately conducts an analysis, and applies the appropriate preventive/corrective measures. All our hotels carry out risk assessment for any area of hazard in order to eliminate accidents. Also, preventive maintenance plan is in place for buildings and equipment in order to provide safe environment for those involved.

Thank you
